

What to expect:

- Qualified, experienced and knowledgeable technicians.
- A Friendly management team at the end of the phone, you will be given advice and support at every step.
- Regular scheduled visits to your contract usually by the same technician to ensure consistency in delivery and developing knowledge of the environment and the issues faced.
 - Full risk assessments and method statements provided.
 - The best products, materials and support from one of the UK's largest suppliers of pest control products.
- Competitive pricing. If you have been given a quotation from a recognised supplier, we are happy to review this upon receipt and present our proposal based on "Best Value" supported by our service delivery experience.
 - Detailed feedback on every visit documented within your Pest Control site visit pack.

Bird Management Services:

Bird Management is often more complicated than it looks and with over twenty years' experience, our technicians can tackle any issue put in-front of them. Whether its netting or spiking, on the roof of a highrise building, or complicated Rope Access, no job is too big or too small.

Our technicians hold all relevant qualifications including IPAF for the use of MEWP's and PASMA for erecting scaffold.
